SUBJECT: Discuss and File Report of Investments, Including Market Values for Investments, for the Month Ending May 31, 2012.

RECOMMEDATION: Discuss and File

FISCAL/MANDATES IMPACT: None

DISCUSSION:

The average daily portfolio balance for the month of May amounted to \$ 1.9 billion. The portfolio yield for the month of May was .62 %. The weighted average days to maturity decreased 6 days to 326 days. The total net monthly earnings were \$ 1 million. The portfolio has been structured to satisfy the anticipated cash flow needs of the participants. The investment practices and portfolio holdings are in compliance with the investment policy.

The portfolio has been managed with the stated objectives of safety, liquidity and earning a competitive rate of return, outlined in the Statement of Investment Policy. In striving to maintain the primary objective, safety of principal, the County portfolio has received a rating of AAf by Standard & Poor's, the highest possible ranking given by the agency. Regarding the secondary objective, maintaining sufficient liquidity to meet cash flow needs, the portfolio is rated S1+, also the highest ranking given by S&P. In light of the first two objectives the portfolio has on balance outperformed its benchmarks, satisfying the final objective, that of earning a competitive rate of return.

Europe continued to be the focus during the month as interest rates in Spain and Italy moved higher primarily due to a contagion fear over what may happen in Greece. In Greece, political turmoil has increased dramatically as the population is becoming increasingly resistant to on-going austerity measures. One of the key questions is whether Greece should remain in the Euro or return to using the Drachma. Either choice has its challenges, rising inflation if they switch back to the old currency or continued economic weakness and dependency on outside help if they stay with the Euro. The political problems have expanded to almost all the other countries in the

Euro-zone. France has a new President and there is increasing pressure in Germany over funding the weaker countries in the region.

As Europe struggles with a slowing economy, the data in the U. S. is more upbeat. The unemployment rate has continued to edge lower and came in at 8.1% while non-farm payrolls increased by 115,000 jobs. While payrolls have continued to increase the rate of growth appears to be slowing likely due to Europe.

Despite the events in Europe, domestic consumer confidence and sentiment figures are improving along with income and spending data. The improving sentiment is also positively impacting consumer credit, retail sales, business inventories and industrial production.

Meanwhile, interest rates tended to move lower driven by a flight to quality trade out of Europe and into dollar assets. Short-term rates were about unchanged but long-term rates were down 5 to 30 basis points.

Given the current interest rate environment we anticipate the County's yield to drop slightly. Further, we continue to seek investment opportunities in order to optimize earnings (U. S. Treasury Market graph attached).

Attached is a listing of market values provided by our custodian, Wells Fargo Bank, for all investments for the month ending May 31, 2012. GASB Statement no. 31 states that variances between the cost of investments and the fair value of investments shall not be considered budgetary resources or uses of resources unless the value of investments is permanently impaired because of decreased issuer creditworthiness or it is determined that the Treasurer be unable to hold investments to maturity.
